DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The instant invention is distinguished over the prior art of record by providing a method for manufacturing a bare-fiber-metal-coated optical fiber, the method comprising: a subbing-layer formation step of forming, on the peripheral surface of the bare fiber having been exposed by removing the resin cover and on which the metallic coating has not been provided, metallic subbing layer consisting of an electroless plating layer with a thickness necessary for electrolytic plating, and an electrolytic plating layer, followed by; and an end face treatment step by means of an optical cleaver to expose the end face portion of the optical fiber, and followed by an electrolytic plating step to form a surface layer. The prior art of record neither teaches nor suggests the order of the steps and the combination of limitations recited in the instant claims.

Chen teaches a method for manufacturing a bare-fiber-metal-coated optical fiber by forming a metalization layer suitable for bonding the optical fibers to other surfaces; the metalization layer comprises an electroless nickel layer and an electrolytic nickel and gold layer. However, Chen does not explicitly teach an end face treatment step by means of an optical cleaver. Chen uses a mask to shield the end portion of the optical fiber. Bischel et al. teach cleaving and polishing the end faces of an optical fiber, but they do not disclose forming the metalization layer on the optical fiber. The references

neither teach the order of the metalization and end face treatment steps nor the combination of limitations recited in the instant claims.

Since the prior art of record neither teaches nor suggests the order of the metalization and end face treatment steps nor the combination of limitations recited in the instant claims, one skilled in the art would not have been motivated to perform the claimed process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
